## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-60, drawn to initiating a call through an on-line search by receiving a dial link to initiate a phone call with a merchant, classified in class 715, subclass 764.
  - II. Claim 61, drawn to reporting the effectiveness of an advertising campaign based on accumulated calling information for a dial link, classified in class 715, subclass 733.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as accumulating calling information, formulating, formatting, and transmitting a report, without the necessary involvement of invention I's generating a call trigger for initiating a multi-leg phone call with a user phone number and a merchant phone number. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
